RESPONSE TO OFFICE ACTION

Sir:

This correspondence is filed in response to the Office action dated April 5, 2005. Also enclosed is a Petition for Extension of Time within five months.

Claims 14-30 are pending in the application. The claims define a distributed biofeedback system which administers and monitors a biofeedback session of a subject from a remote location, and the subject receives instant feedback from computerized diagnostic and therapeutic equipment and devices. The prior art does not teach conventional or modified biofeedback systems in a network environment wherein the administration and monitoring of a biofeedback session can be done remotely. The claims are therefore patentable over the prior art.

Amendments to the claims are set forth below, followed by an explanation of the novelty of the claims over the prior art.
